

# Homewood School & Sixth Form Tenterden, Kent

## BACKGROUND & CHALLENGES

Barwin RCS completed a comprehensive refurbishment of the Sixth Form facilities at Homewood School in Kent. The project sought to revitalise both the internal learning environments and the external grounds, transforming dated infrastructure into a vibrant, modern educational hub.

The contract demanded a dual-fronted approach: delivering complex infrastructure and services upgrades alongside high-spec aesthetic finishes. Crucially, the external brief involved reclaiming a neglected, disused campus footprint (pictured right) safely within a live school environment.

PREVIOUSLY DISUSED  
OUTDOOR SPACE

## SOLUTIONS

Internally, Barwin RCS executed a complete modernisation. Works included installing a new careers suite, cafe, common area, and staff meeting suites, underpinned by a full services overhaul comprising energy-efficient lighting, new radiators, and modernised WC plumbing.

Externally, the team transformed the dead space into a stunning outdoor cafe terrace featuring fresh landscaping, repainted woodwork, and a newly commissioned lighting scheme. We also championed community collaboration by donating materials and building a prototype picnic table, guiding the pupils as they successfully constructed the remaining campus benches.

## OUTCOMES

The refurbished Sixth Form building is now fully furnished and in active use, providing students with inspiring, modern spaces to study and socialise.

As a direct result of the team's relentless hard work and exceptional quality, Barwin RCS was awarded two further development phases at the school.
